

Winged Mobiles Installation Instructions

Product Contents:

Wing Panel
Body Panel
Mono-filament Line

Tools Required:

- Ladder

1. Establish ceiling location.
2. Slide the wings into the slot of the Mobile's body.
3. Thread the mono-filament through the 2 small holes in body. Allow 12" to 18" inches of line to create a v-connection as pictured. Find the preferred balancing point and attach a long vertical line for the ceiling attachment (ceiling hardware not included). Due to the various ceiling surfaces, ceiling hardware is not included.
